View Systems Announces Increasing International Interest

BALTIMORE, MD -- (GLOBE NEWSWIRE) – January 6, 2010 -- View Systems, Inc. (OTC BB: [VSYM.OB](#)), a security and teledata solutions provider, announced today that the company continues to gain international interest. Inquiries have been received from India, Bangladesh and Yemen, to name a few.

Increased global interest in View's cutting-edge security product line comes mostly from the efforts of international dealers promoting the items to their end users. Belcom, one of View's most trusted international dealers and business partners, has been instrumental in generating leads and moving product. Belcom, a subsidiary of the Belhasa Group of Companies, represents View Systems' products in the Middle East, Africa and Asia regions, and has placed ViewScan units in Saudi Arabia, Bahrain, UAE, India and Pakistan. In late 2009, Belcom announced a ViewScan sale to MphasiS, (a Hewlett Packard Company), to cover its five locations in India. Considering that MphasiS hand-picked the ViewScan confirms the unit's reliability and technological competency.

View representatives were also well-received during a visit to the "Charm of Macao: 10 Year Celebration of Macao's Return to China," where ViewScan units seamlessly scanned each guest as they walked through the main entrance of the event. View's authorized dealer, Zhongbao Security Business Consulting Co., Ltd., a premier security solutions firm based in Shanghai, China, ordered a total of 50 ViewScans last year. The firm took delivery of 20 of the 50 portals some time ago, and placed a few at the Macao Police Bureau. Two additional units were delivered personally by the View Systems representatives during this trip. The ViewScans purchased by SZSBC have been gaining positive attention in China, which led to their utilization for this prestigious event.

Gunther Than, CEO of View Systems, states, "We find ourselves responding to an increasing amount international inquiries regarding not only the ViewScan, but also the MMV and LAW. Prospective clients worldwide tend to prefer the ViewScan due to its non-contact, hands-off screening and rapid throughput; the ViewScan is 4-5 times faster than its leading competitors. We continue to rely on the support efforts of our authorized international dealers who act as a catalyst for prompt and accurate communications and sales."
