

RELEASE DATE: June 18, 2009

VIEW SYSTEMS MOVES FORWARD WITH MICRO-DUCT INSTALLATION PROJECTS

BALTIMORE, MD – [CRWE NEWSWIRE] June 18, 2009 -- View Systems, Inc. (OTC BB: [VSYM.OB](#)), a security and tele-data solutions provider, announced today that the company's Network Services Division is moving forward with the micro-duct installation projects at hand. The company has formed three teams of fiber installers, each supervised by an experienced field manager.

One of the teams was dispatched last week to commence work on a micro-duct installation project at a multi-dwelling unit which was subcontracted to View Systems. These contracts will continue the proliferation of fiber optic cable in this new digital paradigm. View Systems will be paving the way for these networks to be developed throughout Maryland and Virginia.

Paul Price, Director of View Systems' Network Services Division, states, "We are pleased with the way this first job went and look forward to taking on many more projects. Due to the volume of work that we've been offered, we are continuing to take applications for installers. Interested applicants should contact our Baltimore office. Moving forward, we expect that this section of the business will bring increased profit and recognition to View Systems."

About View Systems, Inc.:

View Systems, Inc. manufactures and installs weapons detection identification systems, video management platforms and tele-data communication networks targeted towards correctional facilities, schools, courthouses, government agencies, event and sports venues, and commercial businesses.
