VIEW SYSTEMS ANNOUNCES JOINT VENTURE WITH TRILLACORPE CONSTRUCTION

Baltimore, MD – June 21, 2011 -- (MARKETWIRE) -- View Systems, Inc. (OTCBB: [VSYM](#)), a security and tele-data solutions provider, announced today that a joint venture with Trillacorpe Construction is set to commence. The JV has been uniquely created to focus on electronic security design and installation throughout the federal contracting arena using Trillacorpe's existing platform and reputation and View's state of the art technology, not to mention its own reputation within state contracting arenas, specifically correctional facilities and schools.

Trillacorpe Construction is a Michigan headquartered, nationally based, certified Service Disabled Veteran Owned Small Business (SDVOSB) that provides construction, architecture and engineering, and consulting services with extraordinary quality and customer satisfaction. Trillacorpe Construction's powerful network of high-level military and political contacts, along with its stellar performance record, is quickly vaulting the company into the upper echelon of the ever-expanding government contracting sector (ranked 26th by Federal Times 2010). Trillacorpe's financial reports show \$1.5 million in first year sales (2008), \$15 million in 2009, and \$28 million in sales to date for 2010, with \$18 million pre-sold for 2011.

Since its inception, Trillacorpe Construction has strategically advanced through the government contracting hierarchy of requirements and has now established itself as a leader within the SDVOSB sector. Contract awards totaling over \$48 million have been received from the Department of Defense, Army Corps of Engineers, Department of Energy, Department of Labor, U.S. Army, U.S. Army National Guard, U.S. Air Force, and the Department of Veterans' Affairs, to name a few. In addition, Trillacorpe possesses a company facility for holding individual security clearances required to access Top Secret federal sites.

Trillacorpe has been honored with many prestigious awards and certifications including but not limited to: the Department of Defense's Nunn-Perry award for best Mentor Protégé team, US Army Chief of Staff's Freedom Salute for leadership and Veteran outreach, US Army Corps Norfolk District's letter of commendation for excellence in building construction, and the American Legion's Leadership award in for hiring Veterans, as well as SBA's Veteran Champion Small Business of the Year, the US Chamber of Commerce Blue Ribbon Award and is currently in the running for 2011's Inc. 500 award.

Frank Campanaro, a decorated Veteran who served in Special Operations Forces, is the founder and CEO of Trillacorpe Construction. Mr. Campanaro states, "Trillacorpe's strengths lie in teaming alliances, in-house expertise, multi-regional capacity, substantial bonding ability, and green practices and sustainability. Our professional mission statement is to provide high quality work on time and under budget, to develop and maintain long-term relationships with customers, and to become the "go-to" contractor of choice when clients have a challenge. Trillacorpe takes pride in employing and subcontracting to Veterans and disabled Veterans. Over the past year, Trillacorpe Construction has gained traction by forming a series of strategic partnerships, including many Fortune 1000 firms, and other integrated joint-teaming agreements with highly-respected, best-in-class firms in order to offer joint compatibility packages in response to Federal bid opportunities. We're anxious to work with View Systems to advance ViewScan installations across the country. We believe that the combination of our substantial bonding capacity, construction and engineering experience with View's exceptional technology will create a successful alliance for both parties."

Gunther Than, CEO of View Systems, states, "Having achieved a lofty 400% annualized growth rate and a remarkable 23% win rate on contracts bid over its first three years of operations, Trillacorpe is poised to move View's technology forward into the more exclusive realms of the government sector. Trillacorpe executives have established loyal, high-level contacts within the political arena as well as in the military and intelligence communities. Although Trillacorpe has always received contract awards based upon its performance and work ethic, its SDVOSB status enables the company to compete for work set aside by the Federal Government and Prime Contractors. We look forward to working with Trillacorpe's experienced team, and believe that their prominent network introductions and minority status will be beneficial in expanding the reach of our cutting-edge security screening product line. Based on Frank Campanaro's twenty years of veteran advocacy, military charity, and substantial business success within the federal sector, we believe he would be an excellent choice for directorship on our board. We're currently working out the details of our business relationship."
